COMP 4342

Advanced Web Application Development

About

- The Association for Computing Machinery, also known as ACM, is a US based international learned society for computing.
- It was founded in 1947 and is the world's largest scientific and educational computing society.
- In our project we aimed to create a website for the student chapter of the ACM club at North American University.
- Total HTML Pages: 8
- Languages/Tools used: HTML/CSS, PHP, MySql
- Hours of Work: 50<

Purpose

- As board member of ACM-W club in our university, wanted to create an official website which can be published if approved.
- Briefly, we will have a home page, where general information is given, and subpages like: events list, board members list, photos, useful resources.
- We hope to help our university and it's students in achieving success in the area of computer science.

Languages

HTML: We used HTML to ensure the proper formatting of text and images for our website.

CSS: CSS is the coding language that gives a website its look and layout.

PHP: Collects User Information, Interacts With MySQL Databases

MySQL: used to interact with the database

Future Enhancements

- Addition of "Event Calender".
- Publishing the website officially at NAU. Using bootstrap to improve the design.

What is ACM

ACM is a professional society dedicated to advancing human capabilities through information technology. Founded in 1947, the Association for Computing Machinery (ACM) is the largest and oldest international scientific and educational computer society in the industry today. Organized only a year after the unveiling of ENIAC, the first general purpose electronic computer, ACM was established by mathematicians and electrical engineers to advance the science and application of information technology.
